Advantages of polyethilen

ROTO TANKS:

- 35 years **TRADITION** in tanks production
- **FLEXIBILITY:** quick delivery and orders of small quantities
- tanks in **ALL COLOURS**
- organize our own **TRANSPORT**
- own **MOULD PRODUCTION** and **R&D** department
- excellent **QUALITY;** ISO standards
- offers **COVERS** and **EQUIPMENT**
- **ECOLOGICAL** tanks production
- **RECYCLING** of old products
- Strong **REFERENCES**

INTRODUCTION

Roto is a global producer of the high quality plastic products and well-known brands. The headquarters is located in Murska Sobota, subsidiaries and distributors in other 20 countries all over the world. The main advantages are innovations and adding value. The growth of company is 20-30% annually. We develop strong relationship with our customers with innovative solutions to increase their competitive advantages and customer satisfaction. We develop plastic solutions where it takes only few days to get from the idea to the product.

ROTOGROUP

The group of companies ROTO is in private ownership and is led by the founder Štefan Pavlinjek. The ROTO business system involves strong R&D, purchasing of raw material, mould production, manufacturing, marketing and sales, distribution and logistic of plastic products in over 20 countries. We deliver products to the customer all over Europe with RotoTrucks. Own transport-park enables us to deliver JIT and lower the costs.

IT TAKES ONLY FEW DAYS FROM THE IDEA TO THE PRODUCT

We develop products together with customers, create prototypes and moulds in own house and manufacture plastic products few days after. With our flexibility we enable them to achieve competitive advantages with quick reaction on market needs, to simultaneously create products regarding their requirements and decreasing costs.

CONSULTING AND PROJECT TEAMS

Our R&D department works as a technical consultant for the customer from the idea of the new product, offering assistance on polymers, product design, surface treatments, development of innovative processes and applications. We develop over 100 products annual. Plastic resins are transformed to special shapes with following technologic processes: thermoforming, injectionmoulding and rotomoulding. We finish products with laser and robots. For products we select appropriate materials, which increase their applicability and durability. In 1996 we received the ISO 9001 certificate.

Our products have common characteristics: a deep aesthetic content, combined with high product functionality and performances. For these reasons, through R&D, we focus on the continuous innovation of materials, design and process in order to guarantee higher quality standards to our customers.

PROTECTION OF ENVIRONMENT

We recycle polymers and use them for special group of products. We develop also products that keep natural wealth. Our responsibility to the environment confirms many rewards, like international reward for ecological partnership and innovation purifying system.

CLASSIC TANKS | KLASSISCHE BEHÄLTER | KLASIČNI REZERVOARJI

TIP ATIS - 220 L, 330 L, 440 L, 660 L
